The SCS Spring and Fall Meeting are the two annual main events of the Swiss Chemical Society SCS in the field of chemical research. The focus of these conferences is the promotion of scientific activities in all domains of chemistry and they assist the chemical society in exchanging important and pioneering knowledge. Furthermore they are the point of contact between universities and industry and establish an effective chemical network.

At the Spring Meeting the target audience are scientists from university and academia of all levels. The organizing committee expects about 200 scientists to attend the meeting next April.

Finances

There is no entrance fee to pay to attend the lectures. It's our goal to keep it for free to ensure a knowledge transfer platform that is open and accessible for everyone. Sponsors and benefactors ensure the necessary financial resources.

Total budget of the event is about 30'000 CHF.
