Teaching Language Models to Speak Chemistry

Philippe Schwaller

Laboratory of Artificial Chemical Intelligence, School of Basic Sciences,
École Polytechnique Fédérale de Lausanne (EPFL), CH
philippe.schwaller@epfl.ch

In LIAC, we develop artificial intelligence and machine learning approaches for accelerating the synthesis and discovery of novel molecules and materials. We do fundamental science driven by real-world use cases focusing on sustainability.

LIAC is derived from the French lab name (laboratoire d'intelligence artificielle en chimie).
