

Swiss Chemical Society (SCS)

The Swiss Chemical Society (SCS) represents chemists and scientists from chemistry related fields in national and international organizations. The society supports the exchange of scientific and technical know-how and offers corresponding networking possibilities to the academic and industrial community. It has members in more than 50 countries and represents about 2700 individual and institutional members.

Key activities of the SCS include ...

- Scientific meetings, congresses and courses to assist, inform and educate the community in all fields of pure and applied chemistry.
- Awards for outstanding contributions in a wide range of chemical fields.
- Representation of interests of Swiss scientists in national and international organizations.
- Publication of the scientific journal CHIMIA and the involvement in associated journals, e.g. HCA, Journal of ABD, PCCP and the journals of ChemPubSoc.

The SCS is a member of the European Association for Chemical and Molecular Sciences (EuChemS), the Swiss Academy of Sciences (SCNAT) and the Swiss Academy of Engineering Sciences (SATW). It is also connected to the International Union of Pure and Applied Chemistry, IUPAC (with the Platform Chemistry of the SCNAT being the Swiss representative)

SCS Membership includes...

- a subscription to CHIMIA (print and electronic edition).
- reduced or free admission to SCS conferences and symposia.
- reduced fees for participation in training courses of the SCS / Division of Analytical Sciences and its partners.
- receipt of a periodical news-bulletin with national and international news and events announcements in the area of chemistry and related fields.
- special offers from SCS and its partner societies (GDCh, GÖCH, RCS and ACS).
- benefits provided by one of the five SCS Divisions:
 - Division of Fundamental Research
 - Division of Industrial & Applied Chemistry
 - Division of Analytical Sciences
 - Division of Medicinal Chemistry & Chemical Biology
 - Division of Polymers, Colloids & Interfaces
- access to the SCS network

Annual Membership Fees

- | | |
|---------------------------------------|------------------------------|
| – Regular members | CHF 150.– |
| – Bachelor-, master- and PhD students | CHF 50.– |
| – Retired members | CHF 80.– |
| – Corporate members | CHF 800.– |
| – Research groups (min 5 persons) | 15% discount on regular fees |

The Swiss Chemists' Network

Conferences, Symposia, Lectureships and Training Courses

With more than 600 scientific contributions and about 800 participants the SCS Fall Meeting is the largest annual scientific conference in Switzerland. The event offers a unique opportunity for graduate students, post-doctoral fellows and senior scientists from both, academia and industry, to share and exchange the results of their research.

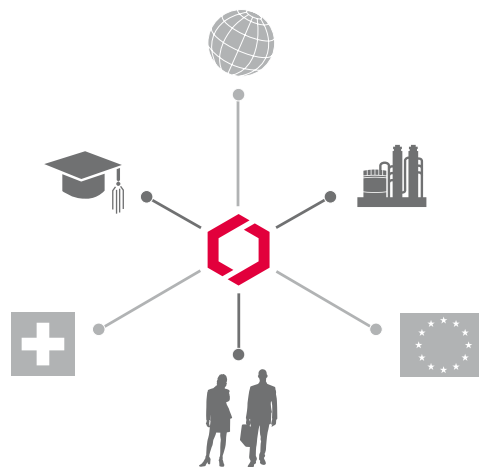

In addition to the Fall Meeting the SCS regularly conducts a range of symposia and conferences on a variety of current topics. These meetings offer a broad-based platform for knowledge exchange and for the establishment and strengthening of personal networks.

Through the SCS Lectureship program outstanding scientists from all over the world are brought to Switzerland to present and discuss cutting-edge research in chemistry. The SCS in collaboration with the GDCh is also the organizer of the renowned Heilbronner-Hückel Lectureships.

The SCS Division of Analytical Sciences together with its partners organizes an attractive program of further training courses. It also supports companies in the organization of in-company training events.

SCS Network

SCS Prizes and Awards

The SCS honors outstanding scientific contributions through various prizes and awards. The award program is directed at both scientists from academia as well as R&D scientists from companies in Switzerland. The most distinguished prizes are awarded for lifetime achievements in Chemistry but SCS honors also scientists throughout their careers, from students to senior scientists.

CHIMIA – International Journal for Chemistry and Official Membership Journal of the SCS

CHIMIA covers the interests of a wide and diverse readership. As one of the characteristic features of the journal, every of its issues is devoted to an area of chemistry that is of great current significance.

CHIMIA is published 10 times a year and is listed in the most important databases. The e-version of CHIMIA is available on ingentaconnect™.

Associated Scientific Journals

In collaboration with other European chemical societies and publishing companies the SCS is co-owner of the following journals:

- Chemistry a European Journal, CEJ (Wiley-VCH)
- ChemPubSoc journals (Wiley-VCH)
- Journal of ABC (Springer)
- Physical Chemistry Chemical Physics, PCCP (RCS)
