

Jola Pospesch

Jola Pospesch obtained her BSc and MSc from the University of Göttingen, studying under Prof. Lutz Ackermann. After completing her PhD at the Leibniz Institute for Catalysis (LIKAT) in Rostock under Prof. Matthias Beller in 2015, Jola joined the group of Prof. David Sarlah at the University of Illinois at Urbana-Champaign as a postdoctoral researcher. In 2017, she became an independent research group leader at the Leibniz Institute for Catalysis and was promoted to associate group leader in 2022. Her research interests include organic photoredox catalysis and photo-mediated functional group transfer, particularly in the context of synthetic and physical organic chemistry and chemical biology.
