2nd Eucchem Conference on Stereochemistry Bürgenstock, May 8 - 14, 1966

President: **Duilio Arigoni**

J Sicher	MONDAY – Moderator: L J Oosterhoff Olefin forming eliminations in medium ring compounds: mechanism and stereochemistry
H Felkin	Stereochemistry of some reactions involving allylic Grignard reagents
O Jeger	Photochemisch induzierte Umwandlungen von Carbonyl-Verbindungen
O Ourisson	TUESDAY – Moderator: A Horeau Études stéréochimiques en série organo-phosphorée
A Liquori	Stereochemistry of polypeptide chains
Ph S Skell	Chemistry of carbon vapour, C ₃ and C ₁
G Wilke	WEDNESDAY – Moderator: W Hüchel Stereochemische Probleme bei der Katalyse mit Hilfe von Übergangsmetallkomplexen <i>Group discussion:</i> Fundamental concepts in stereochemistry
O S Mills	THURSDAY – Moderator: J D Dunitz Success and failure in the search for carbene complexes
R S Nyholm	The reactivity of coordinated ligands
D Hodgkin	Stereochemical aspects of the structure of vitamin B ₁₂ and related compounds
H Eggerer	FRIDAY – Moderator: Sir Christopher Ingold Nucleophilic enzymatic reactions of acetyl-coenzyme A
J A Berson	Memory effects in multiple carbonium ion rearrangement
R B Woodward	The maintenance of orbital symmetry
