12th Euechem Conference on Stereochemistry Bürgenstock, May 9 - 15, 1976

President: **Alan R Battersby**

	MONDAY – Moderator: A Brossi
G W Kirby	The stereochemistry of some microbial transformations
David A. van Dorp	Essential fatty acids and prostaglandins
G Büchi	Synthetic studies on natural products
	TUESDAY – Moderator: R Scheffold
K B Sharpless	Atom transfer oxidations of olefins
G Saucy	Asymmetric reactions applied to the synthesis of α -tocopherol
D Arigoni	Chiral methyl groups revisited
	WEDNESDAY – Moderator: M Anteunis
P Chini	Some problems from the chemistry of the metal cluster carbonyl compounds
K Nakanishi	The structures of some bioactive natural products
	THURSDAY – Moderator: F H Westheimer
M Lazdunski	Molecular aspects of nerve conduction
M Akhtar	Chemical approaches to the elucidation of mechanisms of enzymic reactions: illustrations from the field of natural product biosynthesis
F McCapra	Current problems in bioluminescence
	FRIDAY – Moderator: P Pino
D Seebach	Some regio- and stereochemical aspects in carbanion chemistry
J-H Fuhrhop	Molecular complexes and oxygen adducts of tetrapyrrole pigments
D C Phillips	Studies of the structure and activity of triose phosphate isomerase
