24th Euechem Conference on Stereochemistry Bürgenstock, May 1 - 7, 1988

President: **W Nico Speckamp**

	MONDAY – Moderator: H Wynberg
E P Kündig	Some recent developments in the transformation of arenes via transition metal complexes
S-I Murahashi	New methods for catalytic oxidation of amines and their application for organic synthesis
S-P Sauvage	Interlocking of coordinating molecular threads: catenands and catenates
	TUESDAY – Moderator: J Kutney
K Koga	Enantioselective asymmetric synthesis using chiral bases
J H van Boom	Phosphorylation in organic chemistry
G Bringmann	The stereoselective synthesis of axially chiral natural products
	WEDNESDAY – Moderator: D Bellus
A Ludi	Coordination chemistry of ruthenium: redox pathway and substitution kinetics
C J M Stirling	The effect of strain on reactivity
	THURSDAY – Moderator: U K Pandit
H Schoemaker	Porphyrins in the biodegradation of lignin
M Tomasz	Bioreductive alkylation of DNA by the mitomycins: crosslinks between chemistry and biology
P G Schultz	The interplay between chemistry and biology in the design of new catalysts
	FRIDAY – Moderator: M Vandewalle
P Kocienski	Stereoselective synthesis <i>via</i> enol ethers
J E McMurry	Synthesis and reactions of an <i>in.out</i> -bicycloalkane
R M Williams	Bicyclomycin: a mechanistic, biological and synthetic Pandoras' box
