28th ESF/Euchem Conference on Stereochemistry Bürgenstock, May 2 - 8, 1993

President: **Wolfgang Oppolzer**
Vice-President: **David N Reinholdt**

	MONDAY Morning Session – Moderator: E Winterfeldt
L Hegedus	Synthesis of amino acids and peptides using photochemical reactions of chromium complexes
J E Bäckvall	Stereocontrol in palladium-catalyzed reactions
	MONDAY Evening Session – Moderator: B Giese
G van Koten	Copper arenethiolates as catalysts in stereoselective conjugate addition reactions: organometallic and synthetic aspects
B H Lipschutz	New synthetic methods <i>via</i> organocopper intermediates
	TUESDAY Morning Session – Moderator: D N Reinholdt
W L Jorgensen	Molecular recognition in organic and biochemical systems
P B Sigler	Stereochemistry of specific protein-DNA interactions: lessons at high resolution
	TUESDAY Evening Session – Moderator: D N Reinholdt
G L Verdine	The chemistry of DNA methylation
	WEDNESDAY Morning Session – Moderator: T S Livinghouse
Y Ito	New insertion reactions of isonitriles into organometallic compounds: generation of α -(N-arylimino) alkylsamarium (III) synthetic-equivalents to acyl anions and enantioselective polymerization of 1,2-diisocyano-arenes catalyzed by palladium (II) complex
E N Jacobsen	Asymmetric catalytic oxidation of unfunctionalized alkenes
	THURSDAY Morning Session – Moderator: R M Williams
Ch-H Wong	Enzymes as catalysts for synthesis and as targets for inhibition
A R Fersht	The pathway of folding of a protein
	THURSDAY Evening Session – Moderator: H B Bürgi
H G von Schnering	The curvature of chemical structures
	FRIDAY Morning Session – Moderator: W N Speckamp
D P Curran	Stereochemical control in radical reactions
A Dondoni	Stereocontrolled synthetic methods via thiazole-based masked formylation: new routes to carbohydrates and unusual amino acids
P Knochel	New stereoselective reactions mediated by organozinc reagents
	FRIDAY Evening Session – Moderator: G Ourisson
G Stork	Strychnine and quinine: old problems revisited
