43rd Eucchem Conference on Stereochemistry Fürigen/Bürgenstock, April 12-18, 2008

President: **Don Hilvert**
 Vice-President: **Ben Feringa**
 Guest of Honor: **Dieter Seebach**

Jérôme Lacour Benjamin List	SUNDAY Morning Session – Moderator: Helmut Schwarz Ionic interplay in asymmetric synthesis and catalysis New strategies and concepts for catalysis
Roman Kaiser	SUNDAY Evening Session – Moderator: Lia Addadi The scent of vanishing flora: New and uncommon volatile compounds in most diverse endangered plant species
Lorena S Beese Mohamed A Marahiel	MONDAY Morning Session – Moderator: Ilme Schlichting An integrated view of DNA replication and repair Directing biosynthesis of non-ribosomal peptides: The molecular logic of an assembly line
Ben G Davis	MONDAY Evening Session – Moderator: Peter H Seeberger Sugars and Proteins
Geoffrey W Coates Kyoko Nozaki	TUESDAY Morning Session – Moderator: Ben L Feringa New catalysts for constructing small molecules and polymers of defined stereochemistry OMCOS (OrganoMetallic Chemistry directed towards Organic Synthesis) for polymer synthesis
Frances H Arnold Homme W Hellinga	WEDNESDAY Morning Session – Moderator: Beate Koksich Engineering by evolution Computational protein design
Kai Johnson	WEDNESDAY Evening Session – Moderator: Ehud Keinan Observing and manipulating proteins in living cells
Goverdhan Mehta Justin Du Bois	THURSDAY Morning Session – Moderator: Samir Z Zard Total synthesis of bioactive natural products: Changing context – Emerging opportunities Drawing inspiration for reaction design from Nature's products
David R Liu	THURSDAY Evening Session – Moderator: Helma Wennemers Evolutionary principles applied to biological and synthetic molecules
